

There are four species of bat that regularly occur in the north Highlands but very little is known about their distribution or the numbers involved. This is why we need your help. The Caithness and Sutherland Biodiversity Groups would like to know of any bats you see in the north Highlands. The results will be collated and shared with the Bat Conservation Trust.

Date	Place Grid ref if known	What you saw e.g. roost, single bat, group, dead or alive, species if known.
<b>Name and address (optional)</b>		
If anyone would like to become more involved in future bat survey work in the north (which may involve training) please tick this box and leave your name and address. <input type="checkbox"/>		

Any information you provide will be used solely by the bat conservation trust and biological record centres.  
If you do not wish to receive information about our work in the future by post, please tick this box.
